---

This manual is the latest at the time of printing, and does not include the modification which may be made after the printing, by the constant improvement of product.

## I. Safety Instructions

### CAUTION

**RISK OF ELECTRIC SHOCK  
DO NOT OPEN**

**CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL ONLY.**

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

### PRECAUTIONS DURING SERVICING

1. In addition to safety, other parts and assemblies are specified for conformance with such regulations as those applying to spurious radiation. These must also be replaced only with specified replacements. Examples: RF converters, tuner units, antenna selection switches, RF cables, noise-blocking capacitors, noise-blocking filters, etc.
2. Use specified internal Wiring. Note especially:
  - 1) Wires covered with PVC tubing
  - 2) Double insulated wires
  - 3) High voltage leads
3. Use specified insulating materials for hazardous live parts. Note especially:
  - 1) Insulating Tape
  - 2) PVC tubing
  - 3) Spacers (insulating barriers)
  - 4) Insulating sheets for transistors
  - 5) Plastic screws for fixing micro switches
4. When replacing AC primary side components (transformers, power cords, noise blocking capacitors, etc.), wrap ends of wires securely about the terminals before soldering.

5. Make sure that wires do not contact heat generating parts (heat sinks, oxide metal film resistors, fusible resistors, etc.)
6. Check if replaced wires do not contact sharply edged or pointed parts.
7. Make sure that foreign objects (screws, solder droplets, etc.) do not remain inside the set.

### MAKE YOUR CONTRIBUTION TO PROTECT THE ENVIRONMENT

Used batteries with the ISO symbol for recycling as well as small accumulators (rechargeable batteries), mini-batteries (cells) and starter batteries should not be thrown into the garbage can. Please leave them at an appropriate depot.

### WARNING:

Before servicing this TV receiver, read the X-RAY RADIATION PRECAUTION, SAFETY INSTRUCTION and PRODUCT SAFETY NOTICE.

### X-RAY RADIATION PRECAUTION

1. Excessively high can produce potentially hazardous X-RAY RADIATION. To avoid such hazards, the high voltage must not exceed the specified limit. The normal value of the high voltage of this TV receiver is 27 KV at zero beam current (minimum brightness). The high voltage must not exceed 30 KV under any circumstances. Each time when a receiver requires servicing, the high voltage should be checked. The reading of the high voltage is recommended to be recorded as a part of the service record. It is important to use an accurate and reliable high voltage meter.
2. The only source of X-RAY RADIATION in this TV receiver is the picture tube. For continued X-RAY RADIATION protection, the replacement tube must be exactly the same type as specified in the parts list.
3. Some parts in this TV receiver have special safety related characteristics for X-RADIATION protection. For continued safety, the parts replacement should be under taken only after referring the PRODUCT SAFETY NOTICE.

### SAFETY INSTRUCTION

The service should not be attempted by anyone unfamiliar with the necessary instructions on this TV receiver. The following are the necessary instructions to be observed before servicing.

1. An isolation transformer should be connected in the power line between the receiver and the AC line when a service is performed on the primary of the converter transformer of the set.
2. Comply with all caution and safety related provided on the back of the cabinet, inside the cabinet, on the chassis or picture tube.
3. To avoid a shock hazard, always discharge the picture tube's anode to the chassis ground before removing the anode cap.

4. Completely discharge the high potential voltage of the picture tube before handling. The picture tube is a vacuum and if broken, the glass will explode.
5. When replacing a MAIN PCB in the cabinet, always be certain that all protective are installed properly such as control knobs, adjustment covers or shields, barriers, isolation resistor networks etc.
6. When servicing is required, observe the original lead dressing. Extra precaution should be given to assure correct lead dressing in the high voltage area.
7. Keep wires away from high voltage or high temperature components.
8. Before returning the set to the customer, always perform an AC leakage current check on the exposed metallic parts of the cabinet, such as antennas, terminals, screwheads, metal overlay, control shafts, etc., to be sure the set is safe to operate without danger of electrical shock. Plug the AC line cord directly to the AC outlet (do not use a line isolation transformer during this check). Use an AC voltmeter having 5K ohms volt sensitivity or more in the following manner.

Connect a 1.5K ohm 10 watt resistor paralleled by a 0.15 $\mu$ F AC type capacitor, between a good earth ground (water pipe, conductor etc.,) and the exposed metallic parts, one at a time.

Measure the AC voltage across the combination of the 1.5K ohm resistor and 0.15 uF capacitor. Reverse the AC plug at the AC outlet and repeat the AC voltage measurements for each exposed metallic part.

The measured voltage must not exceed 0.3V RMS.

This corresponds to 0.5mA AC. Any value exceeding this limit constitutes a potential shock hazard and must be corrected immediately.

The resistance measurement should be done between accessible exposed metal parts and power cord plug prongs with the power switch "ON". The resistance should be more than 6M ohms.

## PRODUCT SAFETY NOTICE

Many electrical and mechanical parts in this TV receiver have special safety-related characteristics. These characteristics are offer passed unnoticed by visual spection and the protection afforded by them cannot necessarily be obtained by using replacement components rates for a higher voltage, wattage, etc. The replacement parts which have these special safety characteristics are identified by  marks on the schematic diagram and on the parts list. Before replacing any of these components, read the parts list in this manual carefully. The use of substitute replacement parts which do not have the same safety characteristics as specified in the parts list may create shock, fire, X-RAY RADIATION or other hazards.

## 1.6 Support the Signal Mode

This machine can support the different from VGA signal mode in 7 kinds

| Resolution | Horizontal Frequency (kHz) | Vertical Frequency (Hz) |
|------------|----------------------------|-------------------------|
| 640 x 480  | 31.50                      | 60.00                   |
|            | 37.86                      | 72.81                   |
| 800 x 600  | 35.16                      | 56.25                   |
|            | 37.90                      | 60.32                   |
|            | 46.90                      | 75.00                   |
|            | 48.08                      | 72.19                   |
| 1024 x 768 | 48.40                      | 60.00                   |

## 1.7 HDTV Mode (YPbPr)

| Resolution       | Horizontal Frequency (KHz) | Vertical Frequency (Hz) |
|------------------|----------------------------|-------------------------|
| 480i             | 15.734                     | 59.94                   |
| 480p(720x480)    | 31.468                     | 59.94                   |
| 720p(1280x720)   | 45.00                      | 60.00                   |
| 1080i(1920x1080) | 33.75                      | 60.00                   |

## 1.8 Remote Control

- 1 **Power** (  ): Press to turn on and off.
- 2 **Mute** (  ): Press to mute the sound. Press again or press < , > to restore the sound.
- 3 **CCD**: Press to select the Closed Caption mode.
- 4 **V-CHIP**: Press to select the child protect mode.
- 5 **MTS**: Press repeatedly to cycle through the Multi-channel TV sound (MTS) options: Mono, Stereo and SAP (Second Audio Program).
- 6 **Favorite**: Press repeatedly to cycle through the favorite channel list.
- 7 **PIP. Pos**: Press to change the PIP window position under PIP mode.
- 8 **PIP. Size**: Press to cycle through the PIP size, such as Large, Medium, Small.
- 9 **Add/Erase**: Press to add or delete favorite channel.
- 10 **PIP**: Press to cycles through the different POP or PIP modes, such as Basic PIP, LR POP, and exit.
- 11 **0~9 Number Buttons**: In TV mode, press 0~9 to select a channel; the channel changes after 2 seconds. In DVD mode, press 0~9 to input the items.
- 12 **Zoom**: Press to zoom the image max from 8 times to minimally 1/8 times.
- 13 **Recall**: Press to return to previous channel.
- 14 **P.Mode**: Press repeatedly to cycle through the picture mode: Hi-Bright, User, Dark, Normal and Vivid.
- 15 **P.Size**: Press repeatedly to cycle through the picture size that best corresponds your viewing requirements: Normal, Full, Wide1, Wide2, Wide3, 4:3, No scale, Panoramic and Normal. When in POP mode, it can select picture size is: Full, 4:3 and Normal.
- 16 **Vol**  / : Press to adjust the volume.
- 17 **Ch**  / : Press to scan through channels. To scan quickly through channels, press and hold down either channels.
- 18 **Freeze**: Press to freeze the picture, press again to restore the picture.

(Continued on next page)

- 19 **Menu:** Press to enter into the on-screen setup menu, press again to exit.
- 20 **S.Mode:** Press repeatedly to cycle through the sound mode: Normal, News, Cinema, Flat and User.
- 21 **<, ^, v, >, Enter:** Press <, ^, v, > to move the on-screen cursor. To select an item, press ENTER to confirm. And it can also press ^ or v to scan through channels, press < or > to adjust the volume excepting DVD mode.
- 22 **System:** Press repeatedly to cycle through the system options: AUTO and NTSC3.58.  
(This button is inactive for TV, VGA, COMPONENT input source.)
- 23 **Source:** Press to select the signal source, such as TV, AV, S-Video, Component, DVD or VGA.
- 24 **Sleep:** Press repeatedly until it displays the time in minutes (5 Min, 10 Min, 15 Min, 30 Min, 60 Min, 90 Min, 120 Min and, OFF) that you want the TV to remain on before shutting off. To cancel sleep time, press **Sleep** button repeatedly until sleep OFF appears.
- 25 **Display:** Press to display the channel information and it disappear after 3 seconds.
- 26 **Play/Pause:** Press to play or pause the DVD disc.
- 27 **Stop:** Press to stop playing the disc.
- 28 **Angle:** Press to select desired viewing angle of the Video (disc feature).
- 29 **Open/Close:** Press to open or close the disc tray.
- 30 **Skip+/-:** Press to skip the forward or backward.
- 31 **Search+/- :** Press to search the forward or backward.
- 32 **DVD Menu:** Press to return DVD disc menu.

(Continued on next page)

- 33 **DVD Info:** Press to display DVD information.
- 34 **Setup:** Press to display a menu. Press it again to exit menu.
- 35 **Repeat:** Press repeatedly to cycle through the options: CHAPTER, TITLE, ALL and nothing.
- 36 **Audio:** Press to select desired audio track.
- 37 **Prog:** Press to display the program menu. Press it again to exit.
- 38 **Sub. title:** Press to select desired DVD subtitle.
- 39 **Title:** Press to display to DVD disc title.

*Note: Press **Ch** >/< on the remote control can turn on TV set from last preview mode.*

## Test Condition

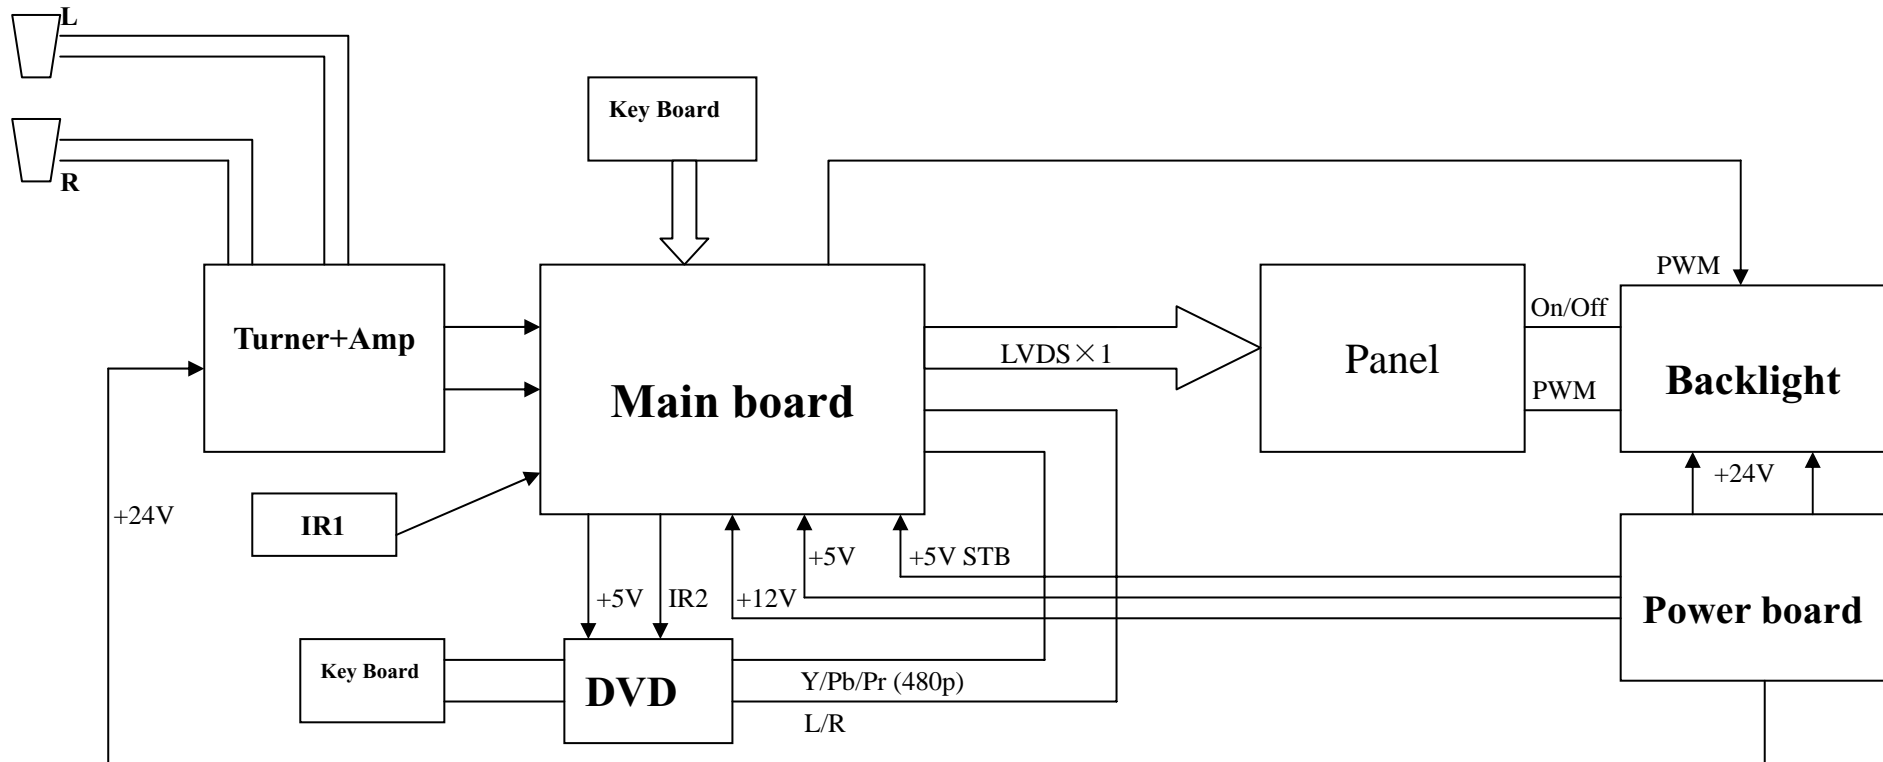

All tests shall be performed under the following conditions unless otherwise specified

|   |  |  |
|---|--|--|
| 1 | Picture Modulation   | 87.5%  |
| 2 | Sound Modulation   | 27KHz Dev. For DK/I/BG<br>15KHz Dev. For M/N |
| 3 | Picture to Sound Ratio   | 10dB   |
| 4 | Sound Artificial Load Resistor   | 8 ohm  |
| 5 | Video signal   | Stair and Special                            |
| 6 | Audio signal   | 1KHz sine wave 0.5Vrms                       |
| 7 | <b>Other conditions:</b><br><b>A.</b> Switch LCD-TV on and let it warm up for more than 30 minutes.<br>Viewing distance: 3H (H: Panel High) in front of LCD, about 2M.<br>Ambient light: $\leq 0.1 \text{ cd/ m}^2$<br><b>B.</b> Brightness, Contrast, Saturation, Tint, sharpness set at normal.<br><b>C.</b> Connect RMS volt meter to speaker terminals and adjust the LCD volume to get 500mW RMS power at each terminals.<br><b>D.</b> With image sticking protection of LCD module. The luminance will descend by time on a same still screen and rapidly go down in 5 minutes, when measuring the color tracking and luminance of a same still screen, be sure to accomplish the measurement in one minute to ensure its accuracy.<br><b>E.</b> Due to the structure of LCD module. The extra-high-bright same screen should not hold over 5 minutes for fear of branding on the panel.<br><b>F.</b> RF test point: Video output. |  |
| 8 | <b>Note:</b><br>*(1) Now this project cannot fit the limited spec. the typical audio input level is 1.0 Vrms,<br>*(2) The audio out level is controlled by the volume level, the range is from 0 to 0.5Vrms.   |  |

# Basic Operations & Circuit Description

## Main Electric Components

### (1). MODULE:

There are 1 pc. panel and 2 pcs. PCB including 1 pc. INVERTER board(L), 1 pc. T-CONTROL board,

### (2).SIGNAL PROCESS

There are 5 pcs. PCBs including

- 1 pc. Audio&Tuner board,
- 1 pc. Main digital board,
- 1 pc. Keypad board,
- 1 pc. Remote Control Receiver board,
- 1 pc. DVD decoder board

### (3).POWER

There are 1 pc. PCB for power.

# PCB function

## 1. Power:

- (1). Input voltage: AC 100V~240V, 47Hz~63Hz.  
Input range: AC 90V(Min)~264V(Max) auto regulation.
- (2). To provide power for PCBs.
  - a). +24V for Inverter.
  - b). +5Vsb for standby,
  - c). +5V for signal power,
  - d). +24V for Audio Amp power and converter to
  - e). +12V for Tuner power.

## 2. Main (Video InterFace) board:

- (1).Decoder the video signal (TV,CVBS,S-VIDEO) from analog to digital signal.
- (2).Converter the Video signals( TV,CVBS,S-VIDEO ) and graphics signal (VGA,YPbPr) from interface to progressive,
- (3). Converter the Digital to fit the panel display mode and output the LVDS signal to Panel.

## 3. Tuner & Audio Board :

- ( 1 ) Convert TV RF signal to video and audio signal to Main board.
- (2 ). Decoder the TV SIF signal to audio signal,
- (3 ). Converter the audio to audio Amplifier and output to the speaker.

## 4. KEYBOARD

To get the main button control on LCD\_TV as SOURCE,MENU, CHANEL +,CHANEL -, VOL +,VOL-, STANDBY functions.

## 5. Remote control board

Receive the remote signal and active for the control.

## 6. T-CONTROL board

Converter the LVDS signal to the digital signal for fitting the PANEL.

## 7. INVERTER board

Converter the low DC voltage +24V to high AC voltage to drive the backlight.

# **PCB failure analysis**

## **1. CONTROL:**

- a. Abnormal noise on screen.
- b. No picture.

## **2. MAIN (VIDEO):**

- a. Lacking color, Bad color scale.
- b. No voice.
- c. No picture but with signals output, OSD and back light.
- d. Abnormal noise on screen.

## **3. POWER:**

No picture, no power output.

# **Basic operation of LCD-TV**

1. After turning on power switch, power board sends 5Vst-by Volt to Micro Processor IC waiting for ON signals from Key Switch or Remote Receiver.
2. When the ON signal from Key Switch or Remote Receiver is detected, Micro Processor will send ON Control signals to Power. Then Power sends (5Vsc, 12Vsc, 24V and RLY ON, Vs ON) to PCBs working. This time VIF will send signals to display back light, OSD on the panel and start to search available signal sources. If the audio signals input, they will be amplified by Audio AMP and transmitted to Speakers.
3. If some abnormal signals are detected (for example: over volts, over current, over temperature and under volts), the system will be shut down by Power off.

## LCD basic display theory.

When an electrical field is applied to the LC planes, the LC molecules re-align themselves so that they are parallel to the electrical field. This electrical process is known as **twisted nematic field effect** or **TNFE**. In this alignment, polarized light is not twisted as it passes through the LC material (see Diagram 3A and 3B). If the front polarizer is oriented perpendicular to the rear polarizer, light will pass through the energized display but will be blocked by the rear polarizer. An LCD in this form is acting as a light shutter.

Displays with variable characters are created by selectively etching away the conductive surface that was originally deposited on the glass. Etched areas become the display's background; unetched areas become the display's characters.

*Diagram 3A. The "off" state of a TN LCD—the LC molecules form a twist and therefore cause polarized light to twist as it passes through.*

*Diagram 3B. The "on" state—the electrical field re-aligns the LC molecules so they do not twist the polarized light.*

## Features

- Low Voltage and Standard Voltage Operation
  - 5.0 (V<sub>CC</sub> = 4.5V to 5.5V)
  - 2.7 (V<sub>CC</sub> = 2.7V to 5.5V)
  - 2.5 (V<sub>CC</sub> = 2.5V to 5.5V)
  - 1.8 (V<sub>CC</sub> = 1.8V to 5.5V)
- Internally Organized 128 x 8 (1K), 256 x 8 (2K), 512 x 8 (4K), 1024 x 8 (8K) or 2048 x 8 (16K)
- 2-Wire Serial Interface
- Bidirectional Data Transfer Protocol
- 100 kHz (1.8V, 2.5V, 2.7V) and 400 kHz (5V) Compatibility
- Write Protect Pin for Hardware Data Protection
- 8-Byte Page (1K, 2K), 16-Byte Page (4K, 8K, 16K) Write Modes
- Partial Page Writes Are Allowed
- Self-Timed Write Cycle (10 ms max)
- High Reliability
  - Endurance: 1 Million Cycles
  - Data Retention: 100 Years
- Automotive Grade and Extended Temperature Devices Available
- 8-Pin and 14-Pin JEDEC SOIC and 8-Pin PDIP Packages

## Description

The AT24C01A/02/04/08/16 provides 1024/2048/4096/8192/16384 bits of serial electrically erasable and programmable read only memory (EEPROM) organized as 128/256/512/1024/2048 words of 8 bits each. The device is optimized for use in many industrial and commercial applications where low power and low voltage operation are essential. The AT24C01A/02/04/08/16 is available in space saving 8-pin PDIP, 8-pin and 14-pin SOIC packages and is accessed via a 2-wire serial interface. In addition, the entire family is available in 5.0V (4.5V to 5.5V), 2.7V (2.7V to 5.5V), 2.5V (2.5V to 5.5V) and 1.8V (1.8V to 5.5V) versions.

## Pin Configurations

| Pin Name                         | Function           |
|----------------------------------|--------------------|
| A <sub>0</sub> to A <sub>2</sub> | Address Inputs     |
| SDA                              | Serial Data        |
| SCL                              | Serial Clock Input |
| WP                               | Write Protect      |
| NC                               | No Connect         |

8-Pin PDIP

16K (2048 x 8)

### Absolute Maximum Ratings\*

Operating Temperature.....-55°C to +125°C

Storage Temperature.....-65°C to +150°C

Voltage on Any Pin  
with Respect to Ground .....-0.1V to +7.0V

Maximum Operating Voltage .....6.25V

DC Output Current.....5.0 mA

\*NOTICE: Stresses beyond those listed under “Absolute Maximum Ratings” may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

## Block Diagram

## Pin Description

**SERIAL CLOCK (SCL):** The SCL input is used to positive edge clock data into each E<sup>2</sup>PROM device and negative edge clock data out of each device.

**SERIAL DATA (SDA):** The SDA pin is bidirectional for serial data transfer. This pin is open-drain driven and may be wire-ORed with any number of other open-drain or open collector devices.

**DEVICE/PAGE ADDRESSES (A2, A1, A0):** The A2, A1 and A0 pins are device address inputs that are hard wired for the AT24C01A and the AT24C02. As many as eight 1K/2K devices may be addressed on a single bus system (device addressing is discussed in detail under the Device Addressing section).

The AT24C04 uses the A2 and A1 inputs for hard wire addressing and a total of four 4K devices may be addressed on a single bus system. The A0 pin is a no connect.

The AT24C08 only uses the A2 input for hardware addressing and a total of two 8K devices may be addressed on a single bus system. The A0 and A1 pins are no connects.

The AT24C16 does not use the device address pins which limits the number of devices on a single bus to one. The A0, A1 and A2 pins are no connects.

## MX29LV160BT/BB

### 16M-BIT [2Mx8/1Mx16] CMOS SINGLE VOLTAGE 3V ONLY FLASH MEMORY

#### FEATURES

- Extended single - supply voltage range 2.7V to 3.6V
- 2,097,152 x 8/1,048,576 x 16 switchable
- Single power supply operation
  - 3.0V only operation for read, erase and program operation
- **Fully compatible with MX29LV160A device**
- Fast access time: 70/90ns
- Low power consumption
  - 30mA maximum active current
  - 0.2uA typical standby current
- Command register architecture
  - Byte/word Programming (9us/11us typical)
  - Sector Erase (Sector structure 16K-Bytex1, 8K-Bytex2, 32K-Bytex1, and 64K-Byte x31)
- Auto Erase (chip & sector) and Auto Program
  - Automatically erase any combination of sectors with Erase Suspend capability.
  - Automatically program and verify data at specified address
- Erase Suspend/Erase Resume
  - Suspends sector erase operation to read data from, or program data to, any sector that is not being erased, then resumes the erase.
- Status Reply
  - Data polling & Toggle bit for detection of program and erase operation completion.
- Ready/Busy pin (RY/BY)
  - Provides a hardware method of detecting program or erase operation completion.
- Sector protection
  - Hardware method to disable any combination of sectors from program or erase operations
  - Temporary sector unprotect allows code changes in previously locked sectors.
- CFI (Common Flash Interface) compliant
  - Flash device parameters stored on the device and provide the host system to access
- 100,000 minimum erase/program cycles
- Latch-up protected to 100mA from -1V to VCC+1V
- Boot Sector Architecture
  - T = Top Boot Sector
  - B = Bottom Boot Sector
- Low VCC write inhibit is equal to or less than 1.4V
- Package type:
  - 44-pin SOP
  - 48-pin TSOP
  - 48-ball CSP
- Compatibility with JEDEC standard
  - Pinout and software compatible with single-power supply Flash
- 10 years data retention

#### GENERAL DESCRIPTION

The MX29LV160BT/BB is a 16-mega bit Flash memory organized as 2M bytes of 8 bits or 1M words of 16 bits. MXIC's Flash memories offer the most cost-effective and reliable read/write non-volatile random access memory. The MX29LV160BT/BB is packaged in 44-pin SOP, 48-pin TSOP and 48-ball CSP. It is designed to be reprogrammed and erased in system or in standard EPROM programmers.

The standard MX29LV160BT/BB offers access time as fast as 70ns, allowing operation of high-speed microprocessors without wait states. To eliminate bus contention, the MX29LV160BT/BB has separate chip enable ( $\overline{CE}$ ) and output enable ( $\overline{OE}$ ) controls.

MXIC's Flash memories augment EPROM functionality with in-circuit electrical erasure and programming. The MX29LV160BT/BB uses a command register to manage this functionality. The command register allows for

100% TTL level control inputs and fixed power supply levels during erase and programming, while maintaining maximum EPROM compatibility.

MXIC Flash technology reliably stores memory contents even after 100,000 erase and program cycles. The MXIC cell is designed to optimize the erase and programming mechanisms. In addition, the combination of advanced tunnel oxide processing and low internal electric fields for erase and program operations produces reliable cycling. The MX29LV160BT/BB uses a 2.7V~3.6V VCC supply to perform the High Reliability Erase and auto Program/Erase algorithms.

The highest degree of latch-up protection is achieved with MXIC's proprietary non-epi process. Latch-up protection is proved for stresses up to 100 milliamps on address and data pin from -1V to VCC + 1V.

## LP2996

### DDR Termination Regulator

#### General Description

The LP2996 linear regulator is designed to meet the JEDEC SSTL-2 specifications for termination of DDR-SDRAM. The device contains a high-speed operational amplifier to provide excellent response to load transients. The output stage prevents shoot through while delivering 1.5A continuous current and transient peaks up to 3A in the application as required for DDR-SDRAM termination. The LP2996 also incorporates a  $V_{SENSE}$  pin to provide superior load regulation and a  $V_{REF}$  output as a reference for the chipset and DIMMs.

An additional feature found on the LP2996 is an active low shutdown ( $\overline{SD}$ ) pin that provides Suspend To RAM (STR) functionality. When  $\overline{SD}$  is pulled low the  $V_{TT}$  output will tri-state providing a high impedance output, but,  $V_{REF}$  will remain active. A power savings advantage can be obtained in this mode through lower quiescent current.

#### Features

- Source and sink current
- Low output voltage offset
- No external resistors required
- Linear topology
- Suspend to Ram (STR) functionality
- Low external component count
- Thermal Shutdown
- Available in SO-8, PSOP-8 or LLP-16 packages

#### Applications

- DDR-I and DDR-II Termination Voltage
- SSTL-2 and SSTL-3 Termination
- HSTL Termination

#### Typical Application Circuit

20057518

# TS5V330

## QUAD SPDT WIDE-BANDWIDTH VIDEO SWITCH WITH LOW ON-STATE RESISTANCE

SCDS164A – MAY 2004 – REVISED MAY 2004

- Low Differential Gain and Phase ( $D_G = 0.64\%$ ,  $D_P = 0.1$  Degrees Typ)
- Wide Bandwidth (BW = 300 MHz Min)
- Low Crosstalk ( $X_{TALK} = -63$  dB Typ)
- Low Power Consumption ( $I_{CC} = 3 \mu A$  Max)
- Bidirectional Data Flow, With Near-Zero Propagation Delay
- Low ON-State Resistance ( $r_{on} = 3 \Omega$  Typ)
- $V_{CC}$  Operating Range From 4.5 V to 5.5 V
- $I_{off}$  Supports Partial-Power-Down Mode Operation
- Data and Control Inputs Provide Undershoot Clamp Diode
- Control Inputs Can Be Driven by TTL or 5-V/3.3-V CMOS Outputs
- Latch-Up Performance Exceeds 100 mA Per JESD 78, Class II
- ESD Performance Tested Per JESD 22
  - 2000-V Human-Body Model (A114-B, Class II)
  - 1000-V Charged-Device Model (C101)
- Suitable for Both RGB and Composite-Video Switching

D, DBQ, OR PW PACKAGE  
(TOP VIEW)

RGY PACKAGE  
(TOP VIEW)

### description/ordering information

The TI TS5V330 video switch is a 4-bit 1-of-2 multiplexer/demultiplexer with a single switch-enable ( $\overline{EN}$ ) input. When  $\overline{EN}$  is low, the switch is enabled and the D port is connected to the S port. When  $\overline{EN}$  is high, the switch is disabled and the high-impedance state exists between the D and S ports. The select (IN) input controls the data path of the multiplexer/demultiplexer.

## 24-bit, 192kHz Stereo CODEC with 5 Channel I/P Multiplexer

### DESCRIPTION

The WM8776 is a high performance, stereo audio CODEC with five channel input selector. The WM8776 is ideal for surround sound processing applications for home hi-fi, DVD-RW and other audio visual equipment.

A stereo 24-bit multi-bit sigma delta ADC is used with a five stereo channel input mixer. Each ADC channel has programmable gain control with automatic level control. Digital audio output word lengths from 16-32 bits and sampling rates from 32kHz to 96kHz are supported.

A stereo 24-bit multi-bit sigma delta DAC is used with digital audio input word lengths from 16-32 bits and sampling rates from 32kHz to 192kHz. The DAC has an input mixer allowing an external analogue signal to be mixed with the DAC signal. There are also Headphone and line outputs, with volume controls for the headphones.

The WM8776 supports fully independent sample rates for the ADC and DAC. The audio data interface supports I<sup>2</sup>S, left justified, right justified and DSP formats.

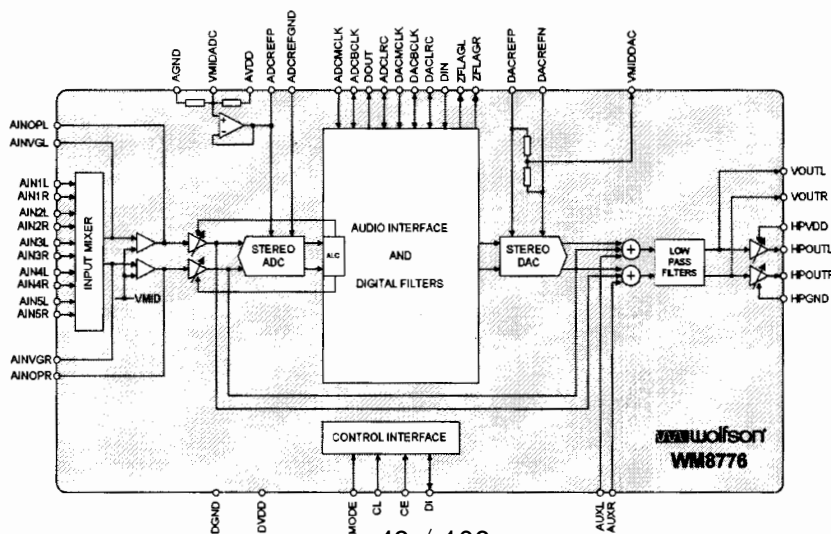

The device is controlled in software via a 2 or 3 wire serial interface, selected by the MODE pin, which provides access to all features including channel selection, volume controls, mutes, and de-emphasis facilities.

The device is available in a 48-pin TQFP package.

## FEATURES

- Audio Performance
  - 108dB SNR ('A' weighted @ 48kHz) DAC
  - 102dB SNR ('A' weighted @ 48kHz) ADC
- DAC Sampling Frequency: 32kHz – 192kHz
- ADC Sampling Frequency: 32kHz – 96kHz
- Five stereo ADC inputs with analogue gain adjust from +24dB to -21dB in 0.5dB steps
- Programmable Limiter or Automatic Level Control (ALC)
- Stereo DAC with independent analogue and digital volume controls
- Stereo Headphone and Line Output
- 3-Wire SPI Compatible or 2-Wire Software Serial Control Interface
- Master or Slave Clocking Mode
- Programmable Audio Data Interface Modes
  - I<sup>2</sup>S, Left, Right Justified or DSP
  - 16/20/24/32 bit Word Lengths
- Analogue Bypass Path Feature
- Selectable AUX input to the volume controls
- 2.7V to 5.5V Analogue, 2.7V to 3.6V Digital supply Operation

### BLOCK DIAGRAM

## APPLICATIONS

- Surround Sound AV Processors and Hi-Fi systems
- DVD-RW

## ±15kV ESD-Protected, +5V RS-232 Transceivers

### General Description

The MAX202E-MAX213E, MAX232E/MAX241E line drivers/receivers are designed for RS-232 and V.28 communications in harsh environments. Each transmitter output and receiver input is protected against ±15kV electrostatic discharge (ESD) shocks, without latchup. The various combinations of features are outlined in the *Selection Guide*. The drivers and receivers for all ten devices meet all EIA/TIA-232E and CCITT V.28 specifications at data rates up to 120kbps, when loaded in accordance with the EIA/TIA-232E specification.

The MAX211E/MAX213E/MAX241E are available in 28-pin SO packages, as well as a 28-pin SSOP that uses 60% less board space. The MAX202E/MAX232E come in 16-pin narrow SO, wide SO, and DIP packages. The MAX203E comes in a 20-pin DIP/SO package, and needs no external charge-pump capacitors. The MAX205E comes in a 24-pin wide DIP package, and also eliminates external charge-pump capacitors. The MAX206E/MAX207E/MAX208E come in 24-pin SO, SSOP, and narrow DIP packages. The MAX232E/MAX241E operate with four 1μF capacitors, while the MAX202E/MAX206E/MAX207E/MAX208E/MAX211E/MAX213E operate with four 0.1μF capacitors, further reducing cost and board space.

### Applications

Notebook, Subnotebook, and Palmtop Computers  
Battery-Powered Equipment  
Hand-Held Equipment

Ordering Information appears at end of data sheet.

### Features

- ♦ **ESD Protection for RS-232 I/O Pins:**
  - ±15kV—Human Body Model
  - ±8kV—IEC1000-4-2, Contact Discharge
  - ±15kV—IEC1000-4-2, Air-Gap Discharge
- ♦ **Latchup Free (unlike bipolar equivalents)**
- ♦ **Guaranteed 120kbps Data Rate—LapLink™ Compatible**
- ♦ **Guaranteed 3V/μs Min Slew Rate**
- ♦ **Operate from a Single +5V Power Supply**

### Pin Configurations

# MEGMEET

| DESCRIPTION: | SPECIFICATION |
|--------------|---------------|
|--------------|---------------|

THESE SPECIFICATIONS ARE THE PROPERTY OF MEGMEET ELECTRICAL TECHNOLOGY CO., LTD  
AND SHALL NOT BE REPRODUCED OR USED AS THE BASIS FOR THE MANUFACTURE OR SELL  
OF APPARATUS OR DEVICES WITHOUT PERMISSION.

2) Outputs shall be bypassed at the connector with a 0.1uF ceramic capacitor and a 10uF electrolytic capacitor to simulate system loading.

### 1.2.3 Output Transient Response.

Table 4. Test condition.

| Voltage Tolerance Limit   | Slew Rate | Load Change                          |
|---|-----------|--------------------------------------|
| V1/V3 $\pm 5\%$<br>+V2 $\pm 10\%$<br>+5V $\pm 5\%$<br>+5.1VSB $\pm 5\%$ | 0.2A/uS   | Min. to 50% load and 50% to Max load |
| all outputs $\pm 10\%$  | 0.2A/uS   | Min. load to Max load                |

Note: Transient response measurements shall be made with a load changing repetition rate of 50Hz to 10kHz.

### 1.2.4 Table 5 DC Output Hold-Up Time.

| Output Voltage | 120Vac input | 220Vac input |
|----------------|--------------|--------------|
| +V1/+V2(+24V)  | $\geq 10$ mS | $\geq 10$ mS |
| +V3(+12V)      | $\geq 10$ mS | $\geq 10$ mS |
| +5V/+5.1VSB    | $\geq 10$ mS | $\geq 10$ mS |

Note: All of dc output at full load.

### 1.2.5 Table 6 DC Output Overshoot At Turn On & Turn Off.

| Output Channel | Output (V) | Over shoot voltage (V) |          |
|----------------|------------|------------------------|----------|
|                |            | Turn on                | Turn off |
| +V1            | +24V       | 2%                     | 2%       |
| +V2            | +24V       | 5%                     | 5%       |
| +V3            | + 12V      | 2%                     | 2%       |
| +5V            | +5V        | 5%                     | 5%       |
| +5.1VSB        | +5. 1V     | 5%                     | 5%       |

Note: All of dc output current from Min. to Max.

### 1.2.6 Table 7 DC output voltage rise time

| Output Voltage | 120Vac input & Full Load | 220Vac input & Full Load |
|----------------|--------------------------|--------------------------|
| +V1/+V2(+24V)  | $\leq 100$ mS            | $\leq 100$ mS            |

| +5V   | ≤100 mS | ≤100 mS |
| +5.1VSB   | ≤100 mS | ≤100 mS |
| Note: The output voltages shall rise from 10% to 90% of their output voltage. |         |         |

### 1.3 Remote On/Off Control:

The power supply DC outputs (without +5.1Vsb) shall be enable with an active-high TTL( $\geq 2.0V/2.0mA$ )-compatible signal(Ps-on). The +5.1Vsb is on whenever the AC power is present.

- \* When Ps-on is pulled to TTL high, the DC outputs are to be enabled.
- \* When Ps-on is pulled to TTL low or open circuit, the DC outputs are to be disabled.

Table 8.

| Ps-on Signal | Comments                       | Outputs |
|--------------|--------------------------------|---------|
| Ps-on- high  | $\geq 2.5V \& 2.0mA$ ( source) | Enable  |
| Ps-on- low   | $\leq 1.5V$                    | X       |
| Ps-on-open   | --                             | X       |
|              |                                |         |

### 1.4 Protection:

#### 1.4.1 Table 9 DC output Over Voltage Protection.

| Output Voltage | Max. Over Voltage | Comments                               |
|----------------|-------------------|--|
| +V1(+24V)      | 28V               | Power supply latch into shutdown state |
| +5.0V          | 7Vtyp             | Hiccup                                 |

Note: The power supply shall be test at max AC voltage (270Vac) and min load or no load.

#### 1.4.2 Table 10 DC Output Over current Protection.

| Output Voltage | Over Current | Comments |
|----------------|--------------|----------|
|                |              |          |

| +V3(+12V)      | Shutdown |
| +5V/5.1VSB     | Hiccup   |

#### 1.4.4 Reset After Shutdown.

Recycle the ps-on signal, the power supply will restart after the fault removed.

## 2. Isolation

### 2.1 Table 12

|                 |   |
|-----------------|---|
| Input To Output | DC500V 50M $\Omega$ min (at room temperature) |
| Input To FG     | DC500V 50M $\Omega$ min (at room temperature) |
| Output To FG    | Non Isolated                                  |

### 2.2 Table 13

|                 |                                  |
|-----------------|----------------------------------|
| Input To Output | 3000Vac 50Hz 1minute $\leq 10mA$ |
| Input To FG     | 1500Vac 50Hz 1minute $\leq 10mA$ |
| Output To FG    | Non Isolated                     |

Note: Open FG and Output return.

## 3. Safety

The power supply shall compliance with the following Criterion:

- 1) UL60950
- 2) EN60950
- 3) GB4943-1995/GB8898-2001

**MEGMEET**

**MEGMEET ELECTRICAL TECHNOLOGY CO., LTD.**

## 4. EMC

### 4.1 EMI

The power supply shall compliance with the following Criterion:

1) Conduction Emission :

- \*EN55013, CLASS B
- \*GB13837-2003, CLASS B
- \*CISPR13:2001

2) Radiated Emission :

- \*EN55013, CLASS B
- \*GB13837-2003, CLASS B
- \*CISPR13:2001

### 4.2 EMS

The power supply shall compliance with the following Criterion:

1) ESD

- \*GB17626. 2-1998/IEC61000-4-2                      Lever 3

2) EFT

- \*GB17626. 4-1998/IEC61000-4-4                      Lever 3

3) SURGE

- \*GB17626. 5-1998/IEC61000-4-5                      Lever 3

4) DIP

- \*GB17626. 11-1998/IEC61000-4-11                      Class B/C

## 5. Environmental Requirement

### 5.1 Temperature

- \* Operating:                      -10℃ to +50℃.
- \* Store:                              -20℃ to +80℃.

### 5.2 Humidity

- \* Operating:    From 10%to90% relative humidity (non-condensing).
- \* Store:        From 5 to 95% relative humidity (non-condensing).

### 5.3 Altitude

- \* Operating:    to10,000 ft.
- \* Store:                to 20,000ft.

### 5.4 Cooling Method

- \* Ventilation cooling .

### 5.5 Vibration

- \* 10-55Hz, 49.0m/s<sup>2</sup> (5G), 3minutes period, 20minutes each along X, Y and Z axis.

### 5.6 Impact

- \* 196.1m/s<sup>2</sup> (20G),11ms, once each X, Y and Z axis.

## 1. Scope

- 1.1 This specification applies to Slot-in DVD mechanism for DVD player (thereafter called DVD mechanism ). Foryou model : DL-06\*\*.
- 1.2 Any query over the specification shall be expressed by R&D dept. of Foryou Multimedia Electronics Co.,Ltd.
- 1.3 For improving performance purpose, this specification is subject to change according to pre-agreement established between us.
- 1.4 Hardware and software or manufacturing process may subject to change for improvements within the rang of the specifications.

## 2. Dimension of shell and installation

- 2.1 See attachment for details of dimension of shell and installation.

## 3. General specification

### 3.1 Mechanism

- 3.1.1 Disc loading: Motorized loading.
- 3.1.2 Disc ejecting: Motorized ejection.
- 3.1.3 Play: Loading → auto play
- 3.1.4 Skew adjusting: adjust two points on the base of spindle motor.
- 3.1.5 Pick-up feed mode: gear and rack drive.
- 3.1.6 Range of pick-up movement: 22.5mm ~ 59mm, from the center of spindle motor.

## 3.1.7

Anti vibration: two steps of dampers to reduce the vibration.

## 3.2 Power supply

DC12  $\pm 1V$  (600 mA) & DC5 $\pm 0.2V$  (660 mA) .

## 3.3 Pick-up

3.3.1 Pick-up: PVR-520T、PVR-502W (MITSUMI)、HOP-1200S (W) (HITACHI)、  
OPU-3153 (SANKYO)、SF-HD62 (SANYO)、SF-HD65 (SANYO) two laser diode and  
single object lens pickup.

## 3.4 Motor

3.4.1 Spindle motor: DC brush motor: CCM03-030R1-26O ( Moretech).

3.4.2 Sled motor: WRF-300CA-09600.

3.4.3 Loading motor: WFF-050SB-10200.

## 3.5 Detect switch

3.5.1 Pick-up inner position detecting SW: (WI-A278)、(DS3-A-0001)

3.5.2 Disc chucking detecting SW: ESE22 (Type B) $\times$  1pcs

3.5.3 Disc detecting SW: ESE22 (Type B) $\times$  2pcs (Panasonic).

3.6 Weight: approximate 476 g.

## 4. General performance

## 4.1 Disc specification

Diameter of disc:  $\Phi 120 \pm 0.3$ ,  $\Phi 80 \pm 0.3$

Thickness of Disc: 1.2(+0.3,-0.1)

Type of disc:

DVD Video;  
CD-DA;  
Video CD;  
CD-R, CD-RW;

#### 4.2

Prevention from the 2<sup>nd</sup> disc insertion: the second disc can't be loaded when there is a disc in mechanism.

#### 4.3

Noise Spec.  $\leq 65$  dB (A)

Noise level tests shall be carried out in an anechoic room with background noise 20 dB (A) or less. Noise shall be measured at a position 10cm from the front of the mechanical section.

### 5. Conditions of operation and storage

5.1 Operation temperature range: 0°C ~ +45°C.

5.2 Range of storage: -20°C ~ +60°C

5.3 Operation moisture range: 10% ~ 80% RH.

5.4 Storage moisture range: 0% ~ 90% RH.

5.5 Atmospheric pressure: 860mBar ~ 1060 mBar.

### 6. Condition of performance evaluation

6.1 Installation: see attachment. Tightened on work table; Installation angle:  
forth and back:  $\pm 10^\circ$ , left and right:  $\pm 10^\circ$ .

#### 6.2 Environment of evaluation

Temperature :  $25 \pm 2^\circ\text{C}$

Humidity :  $60 \pm 5\%$  (RH)

But, if have no doubt to the evaluation result, you can also according to the following items:

Temperature : +15℃ ~ +30℃

Humidity : 45% ~ 75%RH

Noise: in an anechoic room with background noise 20dB (A) or less.

### 6.3 Test circuit and equipment

#### 6.3.1

Refer FORYOU's standard circuit and equivalent.

## 7. Reliability test

### 7.1 Environment test

| Item  | Specification   |
|---|---|
| 7.1.1<br><br>Test of high temperature storage                   | After 24hours kept at +60℃, and then 16 hours at room temperature, the mechanism shall be able to load/eject and playback within this process.(Test disc:TCD-792 and TDV-520A)        |
| 7.1.2<br><br>Test of low temperature storage                    | After 24hours kept at -20℃, and then 16 hours at room temperature, the mechanism shall be able to load/eject and playback within this process.(Test disc:TCD-792 and TDV-520A)        |
| 7.1.3<br><br>Test of high temperature and high moisture storage | After 48hours kept at +40℃, 90%RH, and then 16 hours at room temperature, the mechanism shall be able to load/eject and playback within this process.(Test disc:TCD-792 and TDV-520A) |

|  |  |
|--|--|
| 7.1.4<br><br>High and low temperature cycling test | Applied -20℃(1H)←→60℃(1H)(temperature slope 80℃/H), 5cycles,then place at normal temperature for 16 hours, the mechanism shall be able to load/eject and playback within this process.(Test disc:TCD-792 and TDV-520A) |
| 7.1.5<br><br>Test of high temperature operation    | DVD mechanism shall be kept in 45℃ for 4 hours, and then operate, the mechanism shall be able to load/eject and playback within this process.(Test disc:TCD-792 and TDV-520A)  |
| 7.1.6<br><br>Test of low temperature operation     | DVD mechanism shall be kept in 0℃ for 4 hours, and then operate, the mechanism shall be able to load/eject and playback within this process.(Test disc:TCD-792 and TDV-520A)   |

## 7.2 Life test

| Item                                   | Specification  |
|--|--|
| 7.2.1<br><br>Continue playback ability | When a mechanism is executed for continuous playing at room temperature for 1,000H, the mechanism shall be able to playback standard disc TDV-520A and TCD-792.  |
| 7.2.2<br><br>Feed motion               | After conduct 200,000 times of pick-up feeding motion at room temperature, mechanism shall be able to playback standard disc TDV-520A and TCD-792. (One cycle: inner →outer→ inner).                       |
| 7.2.3<br><br>Loading and ejection      | At normal room temperature, after 10,000 times of disc loading and ejection circulation, mechanism shall be able to playback standard disc TDV-520A and TCD-792. (One cycle :Disc in →playback → disc out) |

## 7.3 Drop and impact test:

| Item | Specification |
|------|---------------|
|------|---------------|

|                     |   |
|---------------------|---|
| 7.3.1<br>Shock test | (1 time ,6ms), 70G crash impact on each of 6 sides of mechanism. Mechanism shall be able to playback standard disc TDV-520A and TCD-792.  |
| 7.3.2<br>Drop test  | <p>After one time of drop test with surface, edge and corner (packing with 10sets per carton), the mechanism shall be able to playback standard disc TDV-520A and TCD-792.</p> <p>Drop with surface: drop height 600mm, Drop sequence: bottom, front, left, back, right. Each surface drop one time.</p> <p>Drop with corner: drop height 450mm, Drop one of corners of carton bottom one time.</p> <p>Drop with edge: drop height 450mm, Each edge of drop corner (three edges) drop one time.</p> |

#### 7.4 Durability test of vibration

| Item                                  | Specification   |
|---------------------------------------|---|
| 7.4.1<br>Durability test of vibration | Acceleration 2.5G, Frequency 10~50Hz, sweep time 5minutes, test time is 20minutes with each of 3 directions. After that test, mechanism shall be able to playback standard disc TDV-520A and TCD-792. |

#### 7.5

The test environment is the same as item 6.2 except for special note.

#### 8.

Ref appearance drawing

#### 9.

Caution:

##### 9.1

It is not allowed to disassembly and re-tune the mechanism without special training because the mechanism is assembled and tuned using special method.

##### 9.2

Storage: avoid storing the mechanism in high temperature, heavy wet and dusty place.

- 
- 9.3 Handling: avoid extra force to the mechanism when handling.
- 9.4 Static-proof action should be taken when touch the mechanism since LD and OEIC can be easily damaged by static.
- 9.5 Hand touch pickup is forbidden.
- 9.6 Must avoid laser beam shooting at eyes directly since the laser beam can hurt eyes.

## 1. OVERVIEW

CLAA320WA01 is 32" color (80.04cm) TFT-LCD (Thin Film Transistor Liquid Crystal Display) module composed of LCD panel, LVDS driver ICs, control circuit and backlight. By applying 8 bit digital data, 1366\*768, 16.7 million-color images are displayed on the 32" diagonal screen. Interface of data and control signals is Typ. Inverter for backlight is included in this module. General specification are summarized in the following table:

### 1.1 GENERAL INFORMATION

| Items                   | Specifications   | Unit  |
|-------------------------|--|-------|
| Display Area            | 697.68(H) × 392.25(V) (31.51 inch diagonal)                              | mm    |
| Number of Pixels        | 1366(H) × 768(V)   | 16:9  |
| Pixel Pitch             | 0.51075(H) × 0.51075(V)  | mm    |
| Color Pixel Arrangement | RGB Vertical Strip   |       |
| Display Mode            | Normally Black   |       |
| Number of Colors        | 16.7M (8bits)  | color |
| Surface Treatment       | Hard coating : 3H ,<br>Anti-reflective coating <less than 2% reflection. |       |
| Total Module Power      | 115  | W     |

### 1.2 MECHANICAL INFORMATION

| Items                          |               |                  | Min   | Typ.  | Max.  | Unit |
|--------------------------------|---------------|------------------|-------|-------|-------|------|
| Module<br>outline<br>dimension | Horizontal(H) |                  | 742.0 | 743.0 | 744.0 | mm   |

|                                  | OFF |                  | 0     | 1    | Vdc  |                 |
| ESD                              |     | VESDt            | -100  | 100  | V    |                 |
|                                  |     | VESDc            | -8000 | 8000 | V    |                 |
| ICC Rush Current                 |     | IRUSH            | --    | 12   | A    |                 |
| Operation Ambient Temperature    |     | T <sub>op</sub>  | 0     | 50   |      | *1) *2) *3) *4) |
| Storage Temperature              |     | T <sub>stg</sub> | -20   | 60   |      | *1) *2) *3) *4) |

[Note]

\*1) The relative temperature and humidity range are as below sketch, 90%RHMax. (Ta 40 )

Humidity 85%RH without condensation.

Relative Humidity 90% (Ta 40 ) , Wet Bulb Temperature 39 (Ta 40 )

\*2) The maximum wet bulb temperature 39 (Ta > 40 ) and without dewing.

\*3) If you use the product in a environment which over the definition of temperature and humidity too long ,this will effect the result of visual inspecfion.

\*4) If you operate the product in normal temperature range, the center surface of panel should be under 60 .

### 3. ELECTRICAL CHARACTERISTICS

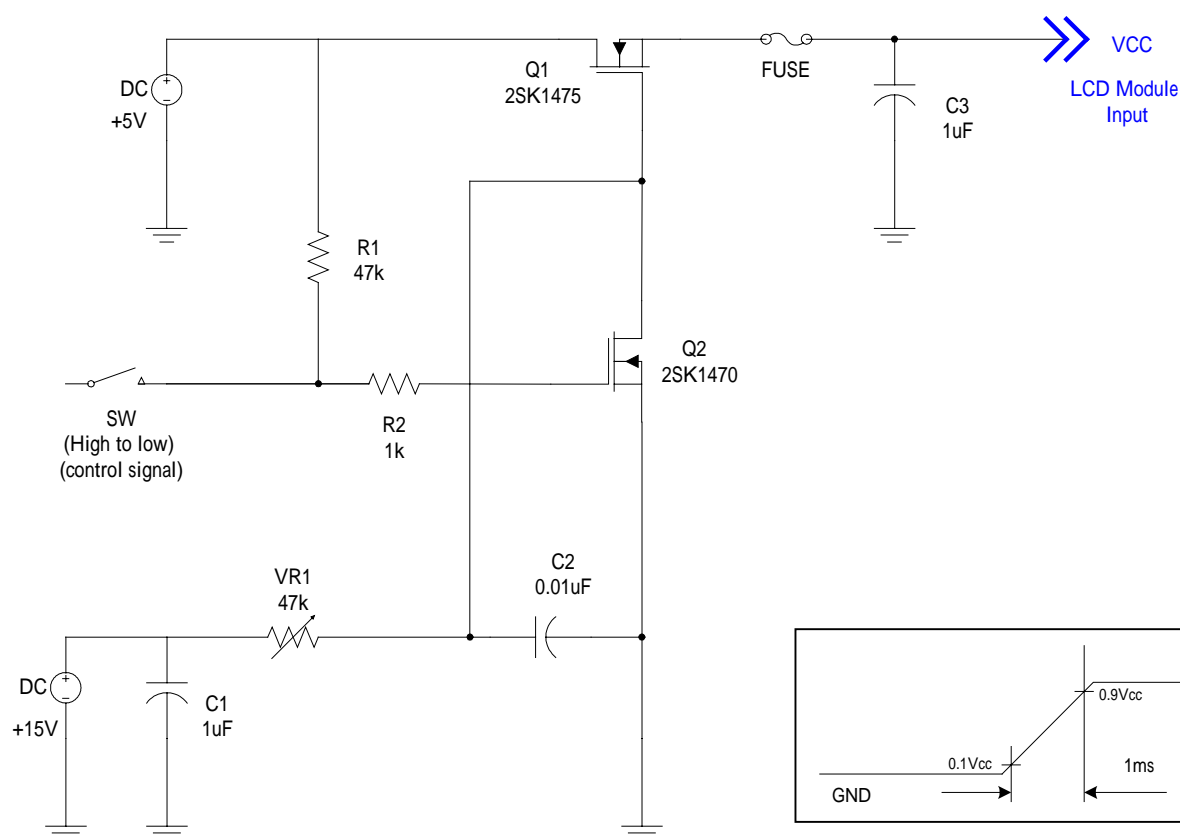

(a). TFT-LCD

Ta=25

| ITEM                          | SYMBOL            | MIN  | TYP  | MAX  | UNIT  | REMARK                  |

| Ripple Voltage                | V <sub>rp</sub>   | --   | --   | 100  | mVp-p | V <sub>IN</sub> =+12.0V |
| Rush current                  | I <sub>rush</sub> | --   | --   | 8    | A     | [Note 2]                |
| LCD Power Supply Current      | White             | --   | 400  | --   | mA    | [Note 3]                |
|                               | Black             | --   | 350  | --   |       |                         |
|                               | RGB stripe        | --   | 390  | --   |       |                         |
| LCD power consumption         | P <sub>c</sub>    | --   | 6.48 | 9.7  | W     |                         |
| High input voltage of LVDS    | V <sub>IN+</sub>  | --   | --   | 100  | mV    | [Note 4]<br>[Note 5]    |
| Low input voltage of LVDS     | V <sub>IN-</sub>  | 100  | --   | --   | mV    |                         |
| Input common voltage of LVDS  | V <sub>CM</sub>   | --   | 1.25 | -    | V     |                         |
| Input terminal resist of LVDS | R <sub>T</sub>    | --   | 100  | --   | ohm   |                         |

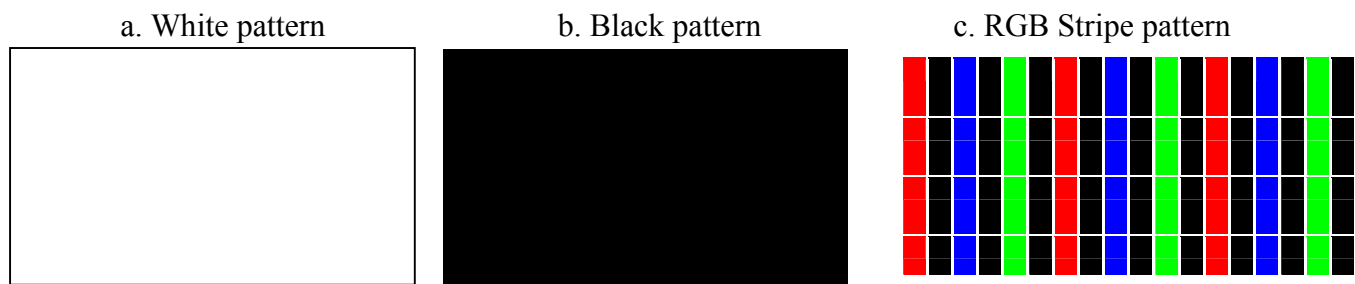

[Note 1] The module should be always operated within above ranges.

[Note 2] Measure conditions :

Vcc rising time is 1 ms

[Note 3] The specified power supply current is under condition at  $V_{CC}=12V$ ,  $T_a=25\pm 2$ ,  $f_v=60Hz$ , whereas a power dissipation check pattern below is displayed.

[Note 4] Power and signal sequence :

$t1$  30ms

$0 < t2 < 50ms$

$0 < t3 < 50ms$

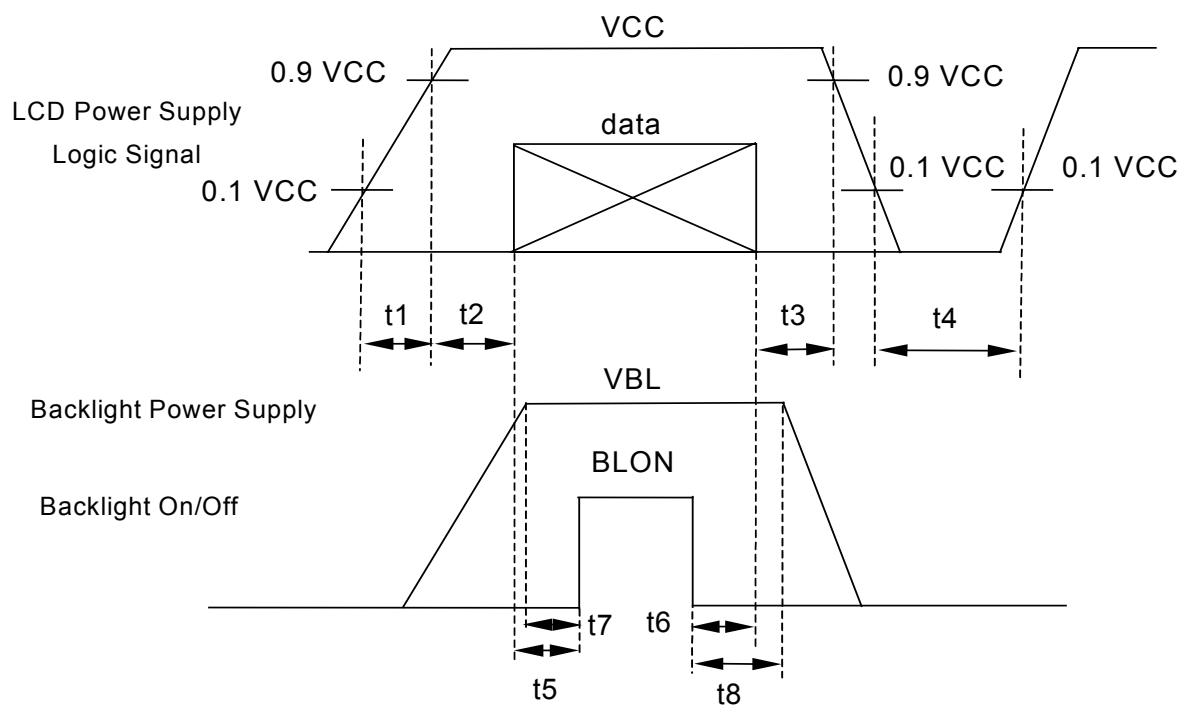

300ms  $t4$

500ms  $t5$

100ms  $t6$

$300 < t7 < 500ms$

$300 < t8 < 500ms$

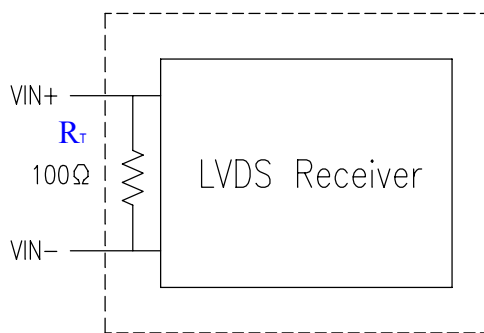

Data: RGB DATA, DCLK, DENA

VCC-dip state :

- 1) When  $9V \leq VCC \leq 11.4V$  ,  $t_d \leq 10$  ms.
- 2)  $VCC > 11.4V$  , VCC-dip condition should also follow the VCC-turn-off condition.

[Note 5] LVDS signal definition :

$$VID = VIN_+ - VIN_- ,$$

$$VCM = | VCM_+ - VCM_- | ,$$

$$VID = | VID_+ - VID_- | ,$$

$$VID_+ = | VIH_+ - VIH_- | ,$$

$$VID_- = | VIL_+ - VIL_- | ,$$

$$VCM = ( VIN_+ + VIN_- ) / 2 ,$$

$$VCM_+ = ( VIH_+ + VIH_- ) / 2 ,$$

$$VCM_- = ( VIL_+ + VIL_- ) / 2$$

VIN+: Positive differential DATA & CLK input

VIN-: Negative differential DATA & CLK input

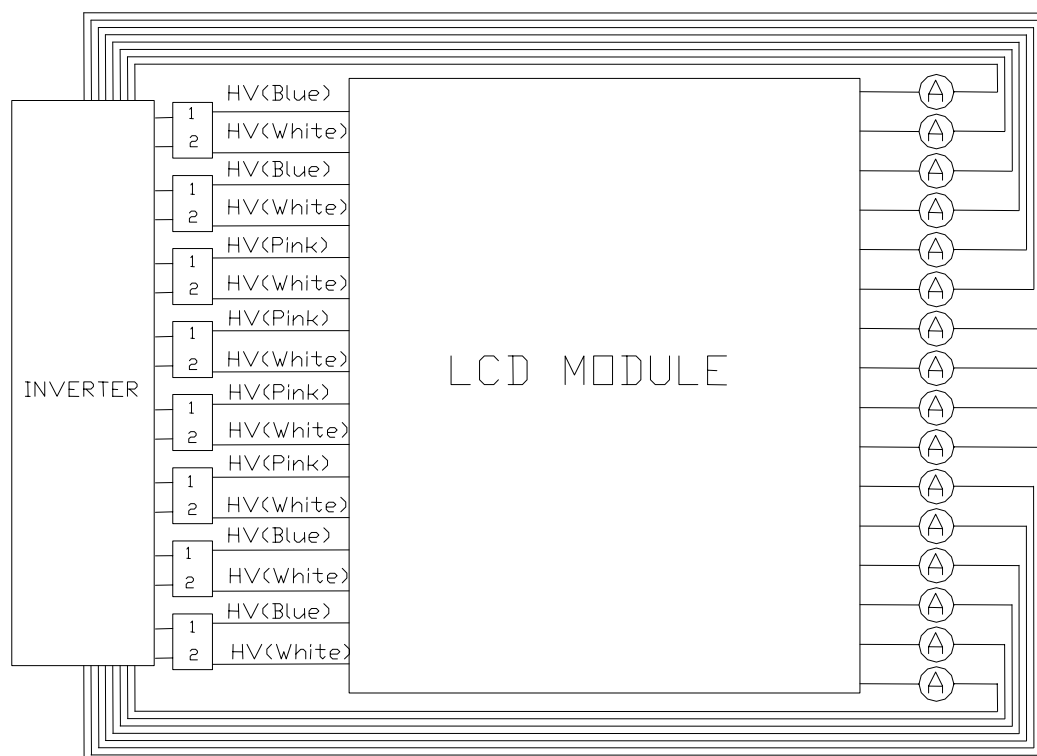

## (b). Backlight

[Note]

\*1) Lamp Current measurement method (The current meter is connected to low voltage end)  
Take the average of 16 CCFL's lamp current as  $V_{DIM} = 5V$ .

\*2) Definition of the lamp life time :

When lamp luminance reduce to 50% or lower than its initial value.

\*3) Ripple voltage that occurs at the instant of power-on can't exceed 30V.

\*4) Electrical and optical characteristics color chromaticity is not included can maintain in a range +/- 10% when the inverter operates within this frequency range.

\*5) Brightness is the darkest when  $V_{DIM} = 0V$  ; Brightness is the darkest when  $V_{DIM} = 5V$  .

\*6) Backlight turns off when  $V_{BLON} = 0V$  ; turns on when  $V_{BLON} = 5V$  (24V must be input in advance)

## 4. INTERFACE PIN CONNECTION

(a).Connector Part No. : FI-X30SSL-HF(JAE) or compatible

| PIN NO | SYMBOL   | DESCRIPTION        | NOTE     |
|--------|----------|--------------------|----------|
| 1      | VCC      | Power supply: +12V |          |
| 2      | VCC      | Power supply: +12V |          |
| 3      | GND      | Ground             |          |

[Note 1] NC for internal use. Let it open.

[Note 2] High (3.3V) → JEIDA LVDS format ; Low (GND) → None-JEIDA

LVDS format, **It should be input High or Low logic level , it can't be NC(Open).**

[Note 3] Color matrix selection. It should be input High or Low logic level , it can't be NC(Open).

## (c) Inverter – side connector : PHR-14(JST)

| PIN NO | SYMBOL | DESCRIPTION          | NOTE     |
|--------|--------|----------------------|----------|
| 1      | VBL    | Supply Voltage 24V   |          |
| 2      | VBL    | Supply Voltage 24V   |          |
| 3      | VBL    | Supply Voltage 24V   |          |
| 4      | VBL    | Supply Voltage 24V   |          |
| 5      | VBL    | Supply Voltage 24V   |          |
| 6      | GND    | Ground               |          |
| 7      | GND    | Ground               |          |
| 8      | GND    | Ground               |          |
| 9      | GND    | Ground               |          |
| 10     | GND    | Ground               |          |
| 11     | NC     | NC(Test pin or else) |          |
| 12     | BLON   | ON/OFF Control       | [Note 1] |
| 13     | VDIM   | 0V~5V                | [Note 2] |
| 14     | GND    | GND                  |          |

[Note 1] ON=5V , OFF=0V ; When this PIN is disconnecting with power , the Inverter is in OFF status.

[Note 2] Max Brightness =5V , Min Brightness =0V ; When this PIN is disconnecting with power , the output status of Inverter is the same as VDIM = 0V.

## 5. INTERFACE TIMING(DE only mode)

### (1) Timing Specification

#### [Note]

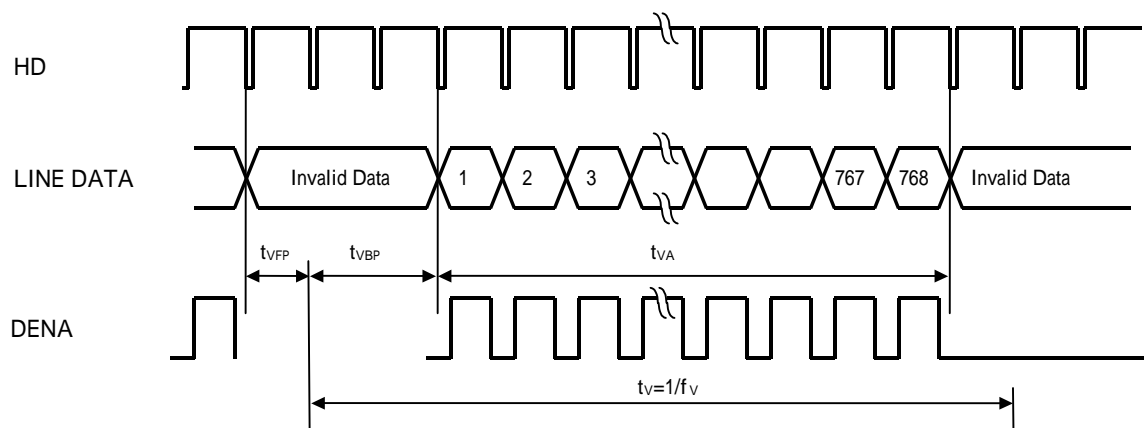

- 1).The best result of over-driving is in frame rate =60Hz.
- 2).This module is operated in DE only mode. Hsync and Vsync input signals should be set to low logic level. Otherwise, this module would be operated abnormally.
- 3).DE (DATA ENABLE) is usually in positive.

## [Note]

These items are measured using : BM-5A (TOPCON) [ under the dark room condition (no ambient light). ]

Measurement Condition :

After lighting on the panel 30 mins, you can proceed the Measurement testing.

The definiton of Typ ualue is under status of lamp current = 5 mArms.(AVG)

Definition of these measurement items is as follows :

- \*1) Definition of Contrast Ratio : [ These items are measured using BM-5A (TOPCON) under the dark room condition (no ambient light). ]

$$CR = \text{ON (White) Luminance} / \text{OFF (Black) Luminance}$$

- \*2) Definition of Luminance and Luminance uniformity and Contrast and Contrast Uniformity and the Deviation of Color Coordinate :

Luminance and Contrast : To measure at the center position “5” on the screen (NO.5) , see Fig.8-1 below.

Luminance uniformity : Lw (MAX) and Lw(MIN) are the maximum and minimum luminance value measure at the position “1~5” on the screen (NO.1~5) , see Fig.8-1 and below show equation :

$$\Delta Lw = [ (Lw(\text{MIN})) / Lw(\text{MAX}) ] \times 100\%$$

Contrast Uniformity : CR(MAX) and CR(MIN) are the maximum and minimum contrast value measure at the position “1~5” on the screen (NO.1~5) , see Fig.8-1 and below show equation. :

$$\Delta CR = [ CR(\text{MIN}) / CR(\text{MAX}) ] \times 100\%$$

The Deviation of Color Coordinate : To measure at the position “1~9” on the screen (NO.1~9) , see Fig.8-1 below.

Figure 8-1. Measurement positions

\*3) Definition of Viewing Angle (  $\theta$  ,  $\phi$  ) :

Figure 8-2. Definition of Viewing Angle

\*4) Definition of Response Time ( White – Black )

Figure 8-3. Definition of Response Time ( White – Black )

\*5) Definition of Response Time ( Gray to Gray ,  $9 \times 9$  levels )

Figure 8-4. Definition of Response Time (Gray to Gray )

The driving signal time means the signal of gray level 0、31、63、95、127、159、191、223、255.

Gray to gray average means the average switching time of gray level 0、31、63、95、127、159、191、223、255 to each other.

The LCD module should be stabilized at given temperature for 1 hour to avoid abrupt temperature change during measuring. In order to stabilize the luminance , the measurement should be

executed

after lighting Backlight for 1 hour in a windless room.

\*6) Image sticking test method:

Continuously display the test pattern shown in the figure below for specified time. To change the module frame to gray pattern ( gray 127 pattern ) , and it's displaying grade still under specification.

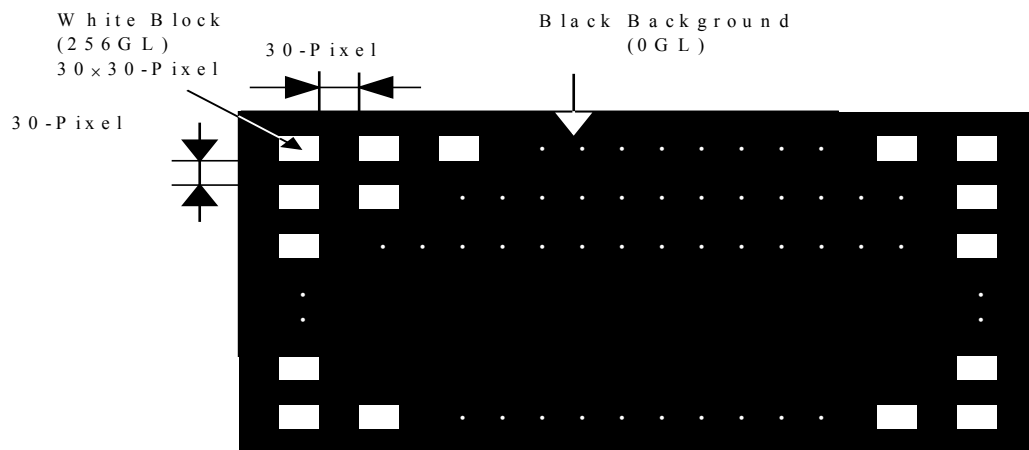

Figure 8-4. the pattern of Image sticking test

## \*7) Definition of Cross talk Ratio

$$CMR = \text{MAX} \left( \left( \frac{LB1 - LA}{LC} \right) \times 100 \% , \left( \frac{LB2 - LA}{LC} \right) \times 100 \% \right)$$

LA : Pattern A(Half-Tone pattern) Measure point Luminance

LB1 , LB2 : Pattern B1、 Pattern B2 Measure point Luminance

LC : Pattern C(white pattern) Measure point Luminance

Figure 8-4. Cross talk

## \*8) Definition of Color Gamut:

To measure RGB three sub-pixels color gamut coordinate at CIE coordinate chart from the center of module , to form a triangle area =  $A_{RGB}$ .

RGB three sub-pixels of NTSC at CIE coordinate chart to form a triangle area =  $N_{RGB}$ .

$$CG = \frac{A_{RGB}}{N_{RGB}} \times 100$$

## 9.RELIABILITY TEST CONDITIONS

### (1)Temperature and Humidity

| TEST ITEMS                                  | CONDITIONS                                     |
|---|--|
| High Temperature Operation                  | 50 ; 240hrs                                    |
| High Temperature Storage                    | 60 ; 240hrs                                    |
| High Temperature<br>High Humidity Operation | 50 ; 90% RH ; 240 hrs<br>(No condensation)     |
| Low Temperature Operation                   | 0 ; 240 hrs                                    |
| Low Temperature Storage                     | -20 ; 240 hrs                                  |
| Thermal Shock                               | Between -20 (1hr) and 60 (1hr) ;<br>100 Cycles |

### (2)Shock & Vibration

| ITEMS                        | CONDITIONS  |
|------------------------------|---|
| Shock<br>(Non-Operation)     | Shock level : $980\text{m/s}^2$ (100G)<br>Waveform : half sinusoidal wave, 2ms<br>Number of shocks : one shock input in each direction of three mutually perpendicular axes for a total of six shock inputs.  |
| Vibration<br>(Non-Operation) | Vibration level : $9.8\text{m/s}^2$ (1.5G) zero to peak<br>Waveform : sinusoidal<br>Frequency range : 10 to 300 Hz<br>Frequency sweep rate : 0.5 octave/min<br>Duration : one sweep from 10 to 300Hz in each of three mutually perpendicular axis(each x , y , z axis : 10 min , total 30 mins) |

### (3) Judgment standard

The judgment of the above test should be made as follow:

Pass: Normal display image with no obvious non-uniformity and no line defect.

Partial transformation of the module parts shall be ignored.

Fail: No display , obvious non-uniformity, or line defects.

## 10.PACKAGING

### 10.1 PACKING SPECIFICATIONS

- (1) 3 LCD TV modules/1 Box
- (2) Box dimensions : 975(L) x 375(W) x 562(H)
- (3) Weight : approximately 31.6kg (3 modules per box)

### 10.2 PACKING METHOD

Figurs 1 and 2 are the packing method

Figure 1 packing method

- (1) Corner protector : L1125 x 50mm x 50mm
- (2) Pallet : L1000 x W1150 x H130mm
- (3) Bottom Cap : 1000 x W1150 x H130mm
- (4) Pallet Stack : 1000 xW1150 x H1250mm
- (5) Gross : 201kg

## 11. DEFINITION OF LABELS

### 11.1 CPT Module Label

The barcode nameplate is pasted on each module as illustration, and its definitions are as following explanation.

(a) LABEL :

- Model Name : CLAA320WA01

- Panel ID : XXXXXXXX XXX

\_\_\_\_\_ CPT Internal Use.

- Product date : X XX XXXX X XXX

\_\_\_\_\_ Customer NO.  
 \_\_\_\_\_ Product Line.  
 \_\_\_\_\_ Serial NO.  
 \_\_\_\_\_ Week.  
 \_\_\_\_\_ Year.

(b) MODULE LABEL :

(c) B/L MAKER LABEL :

(d) Disposal label

11.2. Handling precaution

- (1) Don't disassemble and reassemble the module by self.
- (2) Acid, alkali, alcohol or touched directly by hand will damage the display.
- (3) Static electricity will damage the module. Please configure grounding device.
- (4) The strong vibration, shock, twist or bend will cause material damage, even module broken.
- (5) It is easy to cause image sticking while displaying the same pattern for very long time.
- (6) The response time, brightness and performance will vary from different temperature.
- (7) The inverter will cause high temperature and high voltage, be careful please.

## 12. HANDLING PRECAUTIONS FOR TFT-LCD MODULE

Please pay attention to the followings in handling- TFT-LCD products ;

### 12.1 ASSEMBLY PRECAUTION

- (1) Please use the mounting hole on the module side in installing and do not beading or wrenching LCD in assembling. And please do not drop, bend or twist LCD module in handling.
- (2) Please design display housing in accordance with the following guidelines.
  - Housing case must be destined carefully so as not to put stresses on LCD all sides and not to wrench module. The stresses may cause non-uniformity even if there is no non-uniformity statically.
  - Keep sufficient clearance between LCD module back surface and housing when the LCD module is mounted. Approximately 1.0 mm of the clearance in the design is recommended taking into account the tolerance of LCD module thickness and mounting structure height on the housing.
  - When some parts, such as, FPC cable and ferrite plate, are installed underneath the LCD module, still sufficient clearance is required, such as 0.5mm. This clearance is, especially, to be reconsidered when the additional parts are implemented for EMI countermeasure.
  - Design the inverter location and connector position carefully so as not to give stress to lamp cable, or not to interface the LCD module by the lamp cable.
  - Keep sufficient clearance between LCD module and the others parts, such as inverter and speaker so as not to interface the LCD module. Approximately 1.0mm of the clearance in the design is recommended.
- (3) Please do not push or scratch LCD panel surface with any-thing hard. And do not soil LCD panel surface by touching with bare hands. (Polarizer film, surface of LCD panel is easy to be flawed.)
- (4) Please do not press any parts on the rear side such as source TCP, gate TCP, control circuit board and FPCs during handling LCD module. If pressing rear part is unavoidable, handle the LCD module with care not to damage them.
- (5) Please wipe out LCD panel surface with absorbent cotton or soft clothe in case of it being soiled.
- (6) Please wipe out drops of adhesives like saliva and water on LCD panel surface immediately. They might damage to cause panel surface variation and color change.
- (7) Please do not take a LCD module to pieces and reconstruct it. Resolving and reconstructing modules may cause them not to work well.
- (8) Please do not touch metal frames with bare hands and soiled gloves. A color change of the metal

frames can happen during a long preservation of soiled LCD modules.

- (9) Please pay attention to handling lead wire of backlight so that it is not tugged in connecting with inverter.

## 12.2 OPERATING PRECAUTIONS

- (1) Please be sure to turn off the power supply before connecting and disconnecting signal input cable.
- (2) Please do not change variable resistance settings in LCD module. They are adjusted to the most suitable value. If they are changed, it might happen LCD does not satisfy the characteristics specification.
- (3) Please consider that LCD backlight takes longer time to become stable of radiation characteristics in low temperature than in room temperature.
- (4) A condensation might happen on the surface and inside of LCD module in case of sudden change of ambient temperature.
- (5) Please pay attention to displaying the same pattern for very long time. Image might stick on LCD. If then, time going on can make LCD work well.
- (6) Please obey the same caution descriptions as ones that need to pay attention to ordinary electronic parts.

## 12.3 PRECAUTIONS WITH ELECTROSTATICS

- (1) This LCD module use CMOS-IC on circuit board and TFT-LCD panel, and so it is easy to be affected by electrostatics. Please be careful with electrostatics by the way of your body connecting to the ground and so on.
- (2) Please remove protection film very slowly on the surface of LCD module to prevent from electrostatics occurrence.

## 12.4 STORAGE PRECAUTIONS

- (1) When you store LCDs for a long time, it is recommended to keep the temperature between 0 ~40 without the exposure of sunlight and to keep the humidity less than 90%RH.
- (2) Please do not leave the LCDs in the environment of high humidity and high temperature such as 60 ~ 90%RH.

- (3) Please do not leave the LCDs in the environment of low temperature; below -20 .

## 12.5 SAFETY PRECAUTIONS

- (1) When you waste LCDs, it is recommended to crush damaged or unnecessary LCDs into pieces and wash them off with solvents such as acetone and ethanol, which should later be burned.
- (2) If any liquid leaks out of a damaged-glass cell and comes in contact with the hands, wash off thoroughly with soap and water.

## 12.6 OTHERS

- (1) A strong incident light into LCD panel might cause display characteristics' changing inferior because of polarizer film, color filter, and other materials becoming inferior. Please do not expose LCD module direct sunlight and strong UV rays.
- (2) Please pay attention to a panel side of LCD module not to contact with other materials in preserving it alone.
- (3) For the packaging box, please pay attention to the followings:
  - Packaging box and inner case for LCD are designed to protect the LCDs from the damage or scratching during transportation. Please do not open except picking LCDs up from the box.
  - Please do not pile them up more than 3 boxes. (They are not designed so.) And please do not turn over.
  - Please handle packaging box with care not to give them sudden shock and vibrations. And also please do not throw them up.
  - Packing box and inner case for LCDs are made of cardboard. So please pay attention not to get them wet. (Such like keeping them in high humidity or wet place can occur getting them wet.)

# If you forget your V-Chip Password

- Omnipotence V-Chip Password: **8205**.
- Press **MENU** button.
- Press **LEFT RIGHT** buttons to highlight "MISC" Menu.
- Press **Up, Down** buttons to highlight "Parental".
- Press **ENTER** button to pop up "Input your Password Please".
- Use the **Number buttons** (0~9) to enter an omnipotence Password.
- Press **ENTER** button to confirm and you can select "CHANGE PASSWORD".
- Suggest: Change to your familiar Password again.

## Software upgrade

- Connect the RS-232C input jack to an external control device (such as a computer) and software upgrade.

### Type of connector; D-Sub 9-pin male

| No. | Pin name             |
|-----|----------------------|
| 1   | No connection        |
| 2   | RXD (Receive data)   |
| 3   | TXD (Transmit data)  |
| 4   | DTR (DTE side ready) |
| 5   | GND                  |
| 6   | DSR (DCE side ready) |
| 7   | RTS (Ready to send)  |
| 8   | CTS (Clear to send)  |
| 9   | No Connection        |

### RS-232C configurations

## Software upgrade Process

- Power Switch OFF.
- Connect the serial port of the control device to the RS-232 jack on the LCD-TV back panel.  
RS-232C connection cables are not supplied with the LCD-TV.
- Power Switch ON. The power indicator on the front of the panel should now display red, means that the LCD-TV is in standby mode.
- Copy the software (MTKTOOL) to the computer.
- Open the software (MTKTOOL.EXE)
- Select MTK 8205 and Point "browse" on the interface of the MTKTOOL.exe.
- Select the file which will be update.
- Point "update" on the interface of the MTKTOOL.exe.
- Waiting for the upgrader programing, when it is finished, the bar will display 100%.
- After the upgrader is finished, shut down the power switch, take out the RS-232C connection after the power indicator is extinguished.

Note: After upgrading, the first time of power on will be some long.
